Alvaro Campo - View From Inside a Tree, 2023

Östra promenaden Norrköping, Sweden

In connection with the restoration of Östra promenaden, one of Norrköping's boulevards to its original design from the 1850s, Norrköping Art Museum commissioned three permanent works. The works deal with the theme of the coexistence of species.

1. View From Inside a Tree, 2023

Material: Casting of first generation linden tree in aluminium, granite base.

The sculpture is presented in a traditional way, on a granite pedestal, but here it is interactive. A staircase at the back invites the visitor to climb the pedestal and experience the view from inside the tree. The placement is such that when the visitor stands in the sculpture, she looks straight down onto alley.

2. To Borrow the Roots of a Tree, 2023

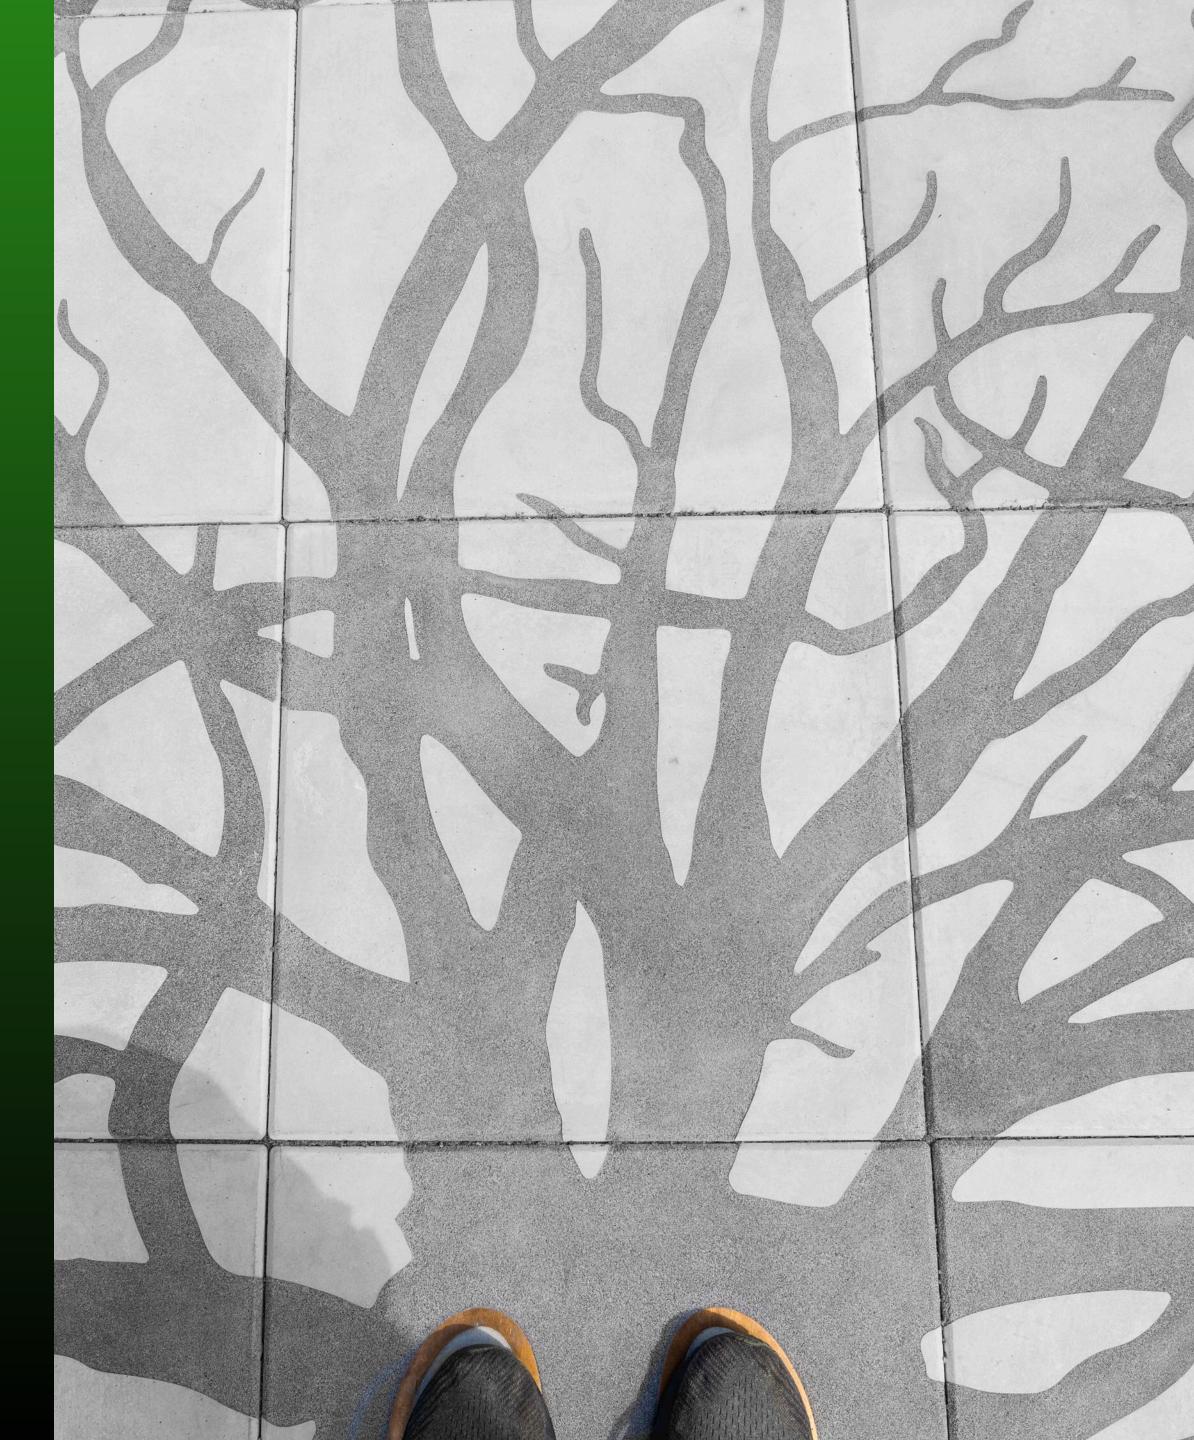

Size: approximately 5x5 metres

Material: Handmade concrete slabs with sandblasted patterns, bronze.

Here the visitor is invited to become part of the work. By standing on the steps, she borrows the tree's roots, and the result is a creature that is half human and half tree.

3. When Trees Have Names, 2023

Collaboration with pupils from Gustaf Adolf School. The pupils have each been asked to name a tree in the alley. The trees are the second generation of linden trees that were planted in 2022 and 2023. The pupils were asked to give the trees names that they might give to a close friend, person or pet in the hope of creating a long-term relationship between the trees and the children. Tree number 58 has been named by the artist himself. The list of tree names has been submitted to and signed by the Chairman of the Municipal Council. It is now archived in the Norrköping city archives.

When Trees Have Names

Collaboration with pupils from Gustaf Adolf School. The pupils have each been asked to name a tree in the alley. The trees are the second generation of linden trees that were planted in 2022 and 2023. The pupils were asked to give the trees names that they might give to a close friend, person or pet in the hope of creating a long-term relationship between the trees and the children. Tree number 58 has been named by the artist himself.

Som en del av konstprojektet "När träd har ett namn" av konstnären Alvaro Campo har 63 elever från Gustaf Adolfskolan fått ge namn till var sitt träd i Östra promenaden. Träden är den andra generationen lindar som planterades 2022 och 2023.

Eleverna ombads att ge träden namn som de skulle ge till en nära vän, person eller till ett husdjur i hopp om att skapa en långvarig relation mellan träden och barnen. Träd nummer 58 har fått sitt namn av konstnären själv.

En förteckning över barnen och trädens namn samt en karta som beskriver var varje träd är placerat har bifogats (se bilaga 2 och bilaga 3).

Dokumenten är en del av konstverket för diarieföring i Norrköpings kommuns stadsarkiv.
